

This warranty is limited to Qora Cladding & Accessories ("The Product(s)") installed on structures permanently located in the contiguous United States, Alaska, Hawaii, or Canada.

1. Warranty Coverage—Limited 20-Year Substrate Warranty:

Arcitell, LLC ("Arcitell")'s warranty is made to the original purchaser of the Product(s) ("Purchaser"); and the original owner of the structure on which the Product(s) are installed; ("Owner"). Arcitell's express warranties may not be assigned to any subsequent owners of the structure.

a) Arcitell warrants that the Product(s) will remain free from: (i) substrate degradation; (ii) buckling; and (iii) excessive cracking, peeling, separating, chipping, flaking or rupturing of the phenolic based resin surface for a period of 20 years from the date application is completed, when the Product(s) has been stored, handled, applied, finished and maintained in accordance with Arcitell's application, finishing, and maintenance instructions in effect at the time of application. Qora Cladding panels are warranted against buckling when installed up to 16 inches o.c. stud spacing and when stored, transported, handled and maintained in accordance with applicable Arcitell Application Instructions. Buckling is defined as 1/2 inch out of plane covering a distance no greater than 16 inches between studs. Waviness due to misaligned framing, crooked or bowed studs, foundation or wall settling, or improper fastening is not considered buckling. Arcitell further warrants that the Product(s) have been manufactured and designed to resist the normal effects of weathering in an exterior application. Additionally, it is the accountability of the installer to assess initial quality of the panels prior to installation and not to install any damaged or otherwise inadequate panels. Installation of the panels indicates acceptance of initial quality and nullifies any claim against Arcitell for color variation

b) Arcitell warrants that the Product(s) will not fade excessively or unevenly for a period of 20 years from the date application is complete, when the Product(s) has been stored, handled, applied, finished and maintained in accordance with Arcitell's application, finishing, and maintenance instructions in effect at the time of application. Excessive fade is defined as a variation of more than 5 Delta E units from the original color upon installation. Uneven fade is defined as a variation of more than 3 Delta E units between panels on the same wall that face the same compass direction. Additionally, it is the accountability of the installer to assess color correctness and color match between panels prior to installation. Installation of the panels indicates acceptance of any color variation within or between panels and nullifies any claim against Arcitell for color variation.

c) Moisture or Water Damage: Qora Cladding must be incorporated into a wall assembly designed by a building professional that contains adequate mechanisms for water management. Arcitell has no responsibility for damaged caused by moisture intrusion through the building envelope or around any of the building envelope components or by vapor transmission from inside of the building to a moisture sensitive part of the wall assembly.

2. Remedies for Breach of Limited Express Substrate Warranty:
