

Touch-Up Paint Reference Guide

Each Qora Cladding panel has multiple component colors that create the unique look of each piece. It may be necessary from time to time to perform touch up paint corrections on your material. Please use the reference chart below to source any required touch-up paint locally. If you are unable to source from a local paint supplier or retail outlet, **please contact Arcitell Customer Service by calling (301) 223-2266 and selecting Option 2. Alternatively, you can send us an email at customerservice@arcitell.com.**

Please note, Arcitell uses PPG Sun Proof brand paint in our manufacturing process. We are continually working with other paint suppliers to identify similar color formulas that will work with our products. This chart will be updated frequently as new colors are added and alternative paint suppliers identified. Also, please note that slight variations in color will occur due to the manufacturing process used for initial coloring. Touch up paint and the recommendations below are for touch up only and should not be used to repaint whole stones or sections of a Qora Cladding panel.

Paint Reference Table

| Qora Cladding Panel Color | Qora Individual Stone Color | |
|---------------------------|---|--|
| | PPG Sun Proof | Sherwin Williams Color |
